

**SYSTEM FOR AND METHOD OF ADJUSTING TEMPO TO
MATCH AUDIO EVENTS TO VIDEO EVENTS OR OTHER
AUDIO EVENTS IN A RECORDED SIGNAL**

ABSTRACT OF THE DISCLOSURE

The system and method herein adjust tempo of an audio recording to match audio events to video events or other audio events in an audio-visual recording. The process of fitting an audio segment to a video or audio segment can include receiving a reference indicating a location in a recorded signal where the reference indicates a desired audio tempo change location in the recorded signal and providing a tempo for an audio recording to be at least partially included in the recorded signal. The tempo is provided to fit the audio recording to a section of the recorded signal marked by the reference.
